

sortimat Handling Systems

Providing customized solutions
for assembly and handling
components and
products.

Handling
Technology

As the newest member of the ATS Life Science Group, we would like to introduce our possibilities. We will expand our focus and, in addition to the existing technology for standard tray handling systems, open up the following additional areas:

Market Segments:

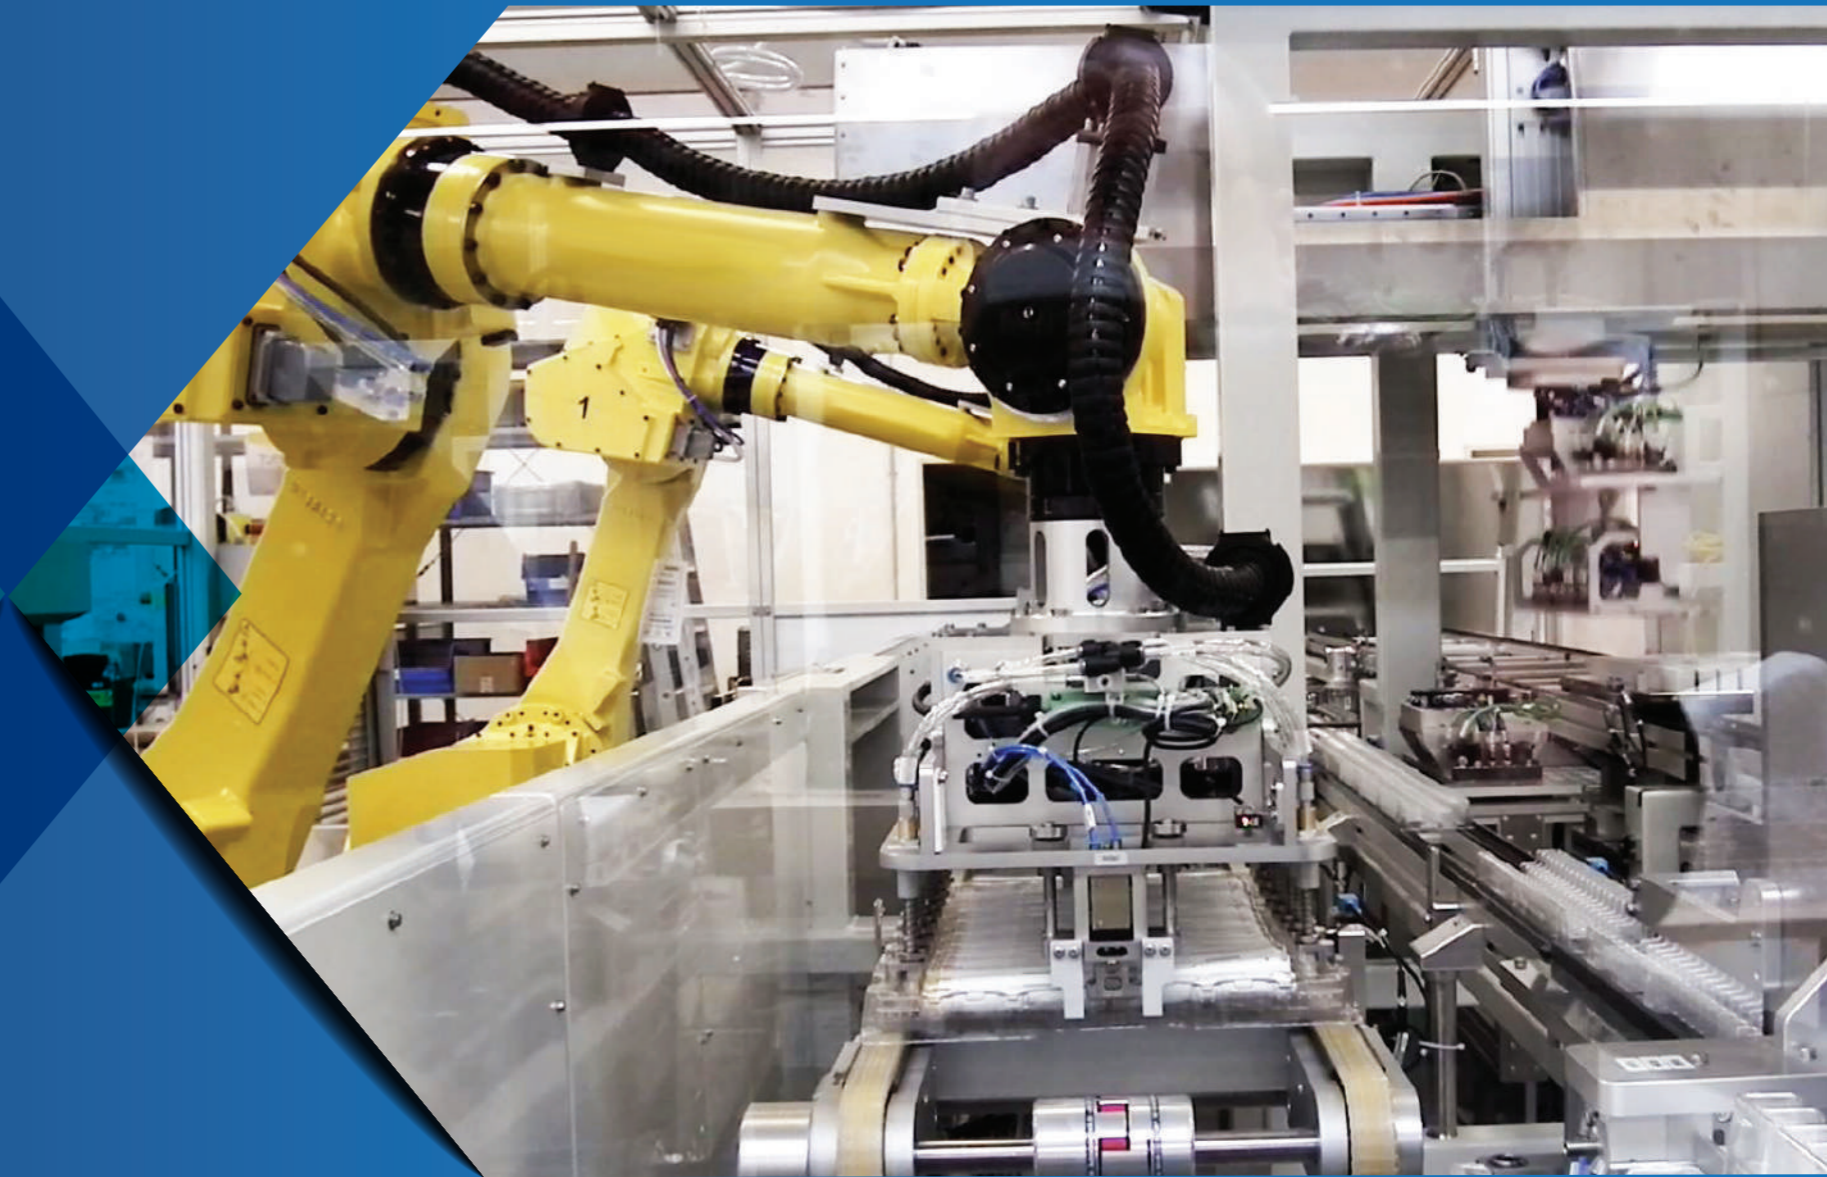

- / Pharmaceutical
- / Medical Device
- / Automotive
- / Cosmetics

Capabilities:

- / Glass Handling Solutions
- / Smart Assembly
- / End-of-Line Equipment
- / Tray Handling and Transfer Systems

Project Management:

- / sortimat project engineers have a wealth of experience and proven expertise to continue effective project planning.
- / Within the scope of Project Management, sortimat clarifies and checks the technical and logistical requirements of your application.

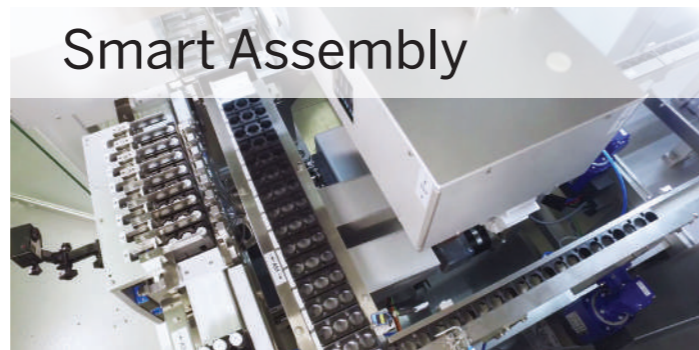

Glass Handling

Glass bodies, pre-filled syringes, vials, etc. Including inspection and other options such as label application, Tub/Nest, or Rondo tray handling.

Smart Assembly

Joining of lids, inserts, and other small assemblies during transfer from tray to assembly areas including test position for correct application etc.

End-of-Line

Loading and unloading of cardboard boxes, handling of single boxes with lid application. Optional closing with adhesive strips or stretch banding and many others.

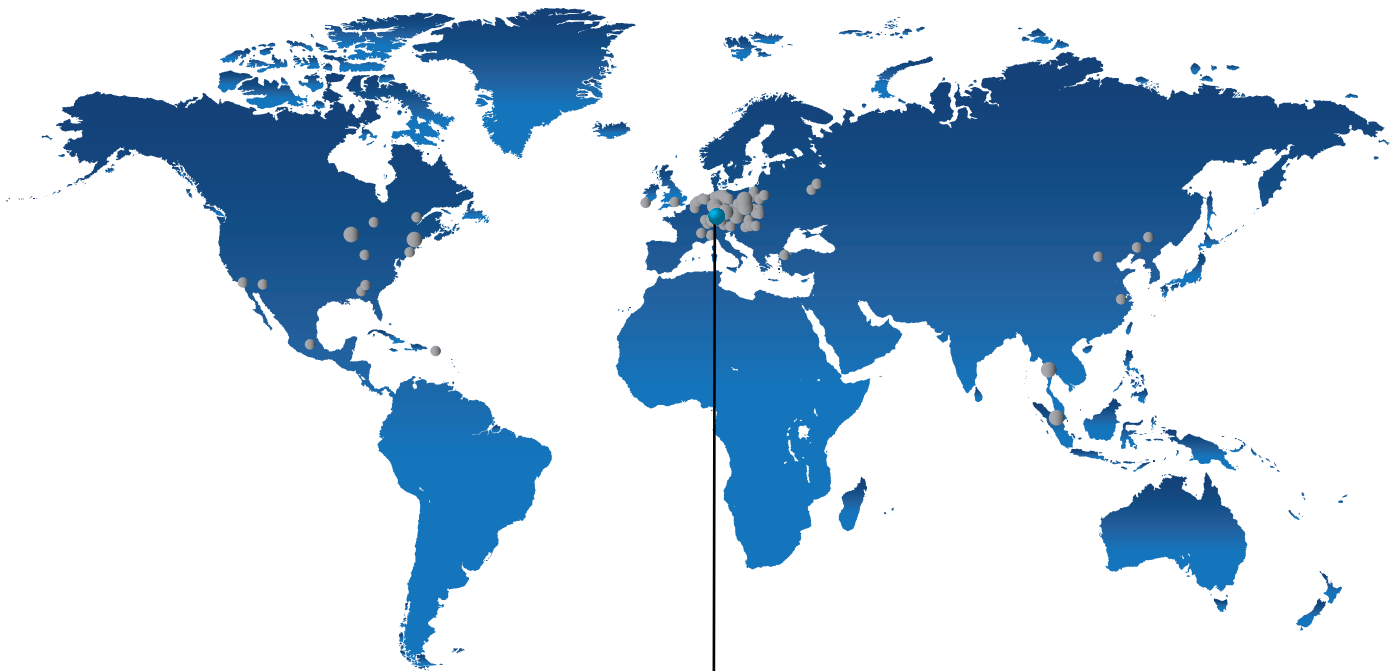

Tray Handling

Standard machines or customized systems upon request.

Global Footprint

The Handling team, based in St. Georgen, harnesses their industry leading experience and unique capabilities to deliver customized solutions for your automation needs.
