

ATS Powertrain Systems

Power Storage Systems
(Battery & Fuel Cell)
E-Drive
Other EV Components

EV Technologies

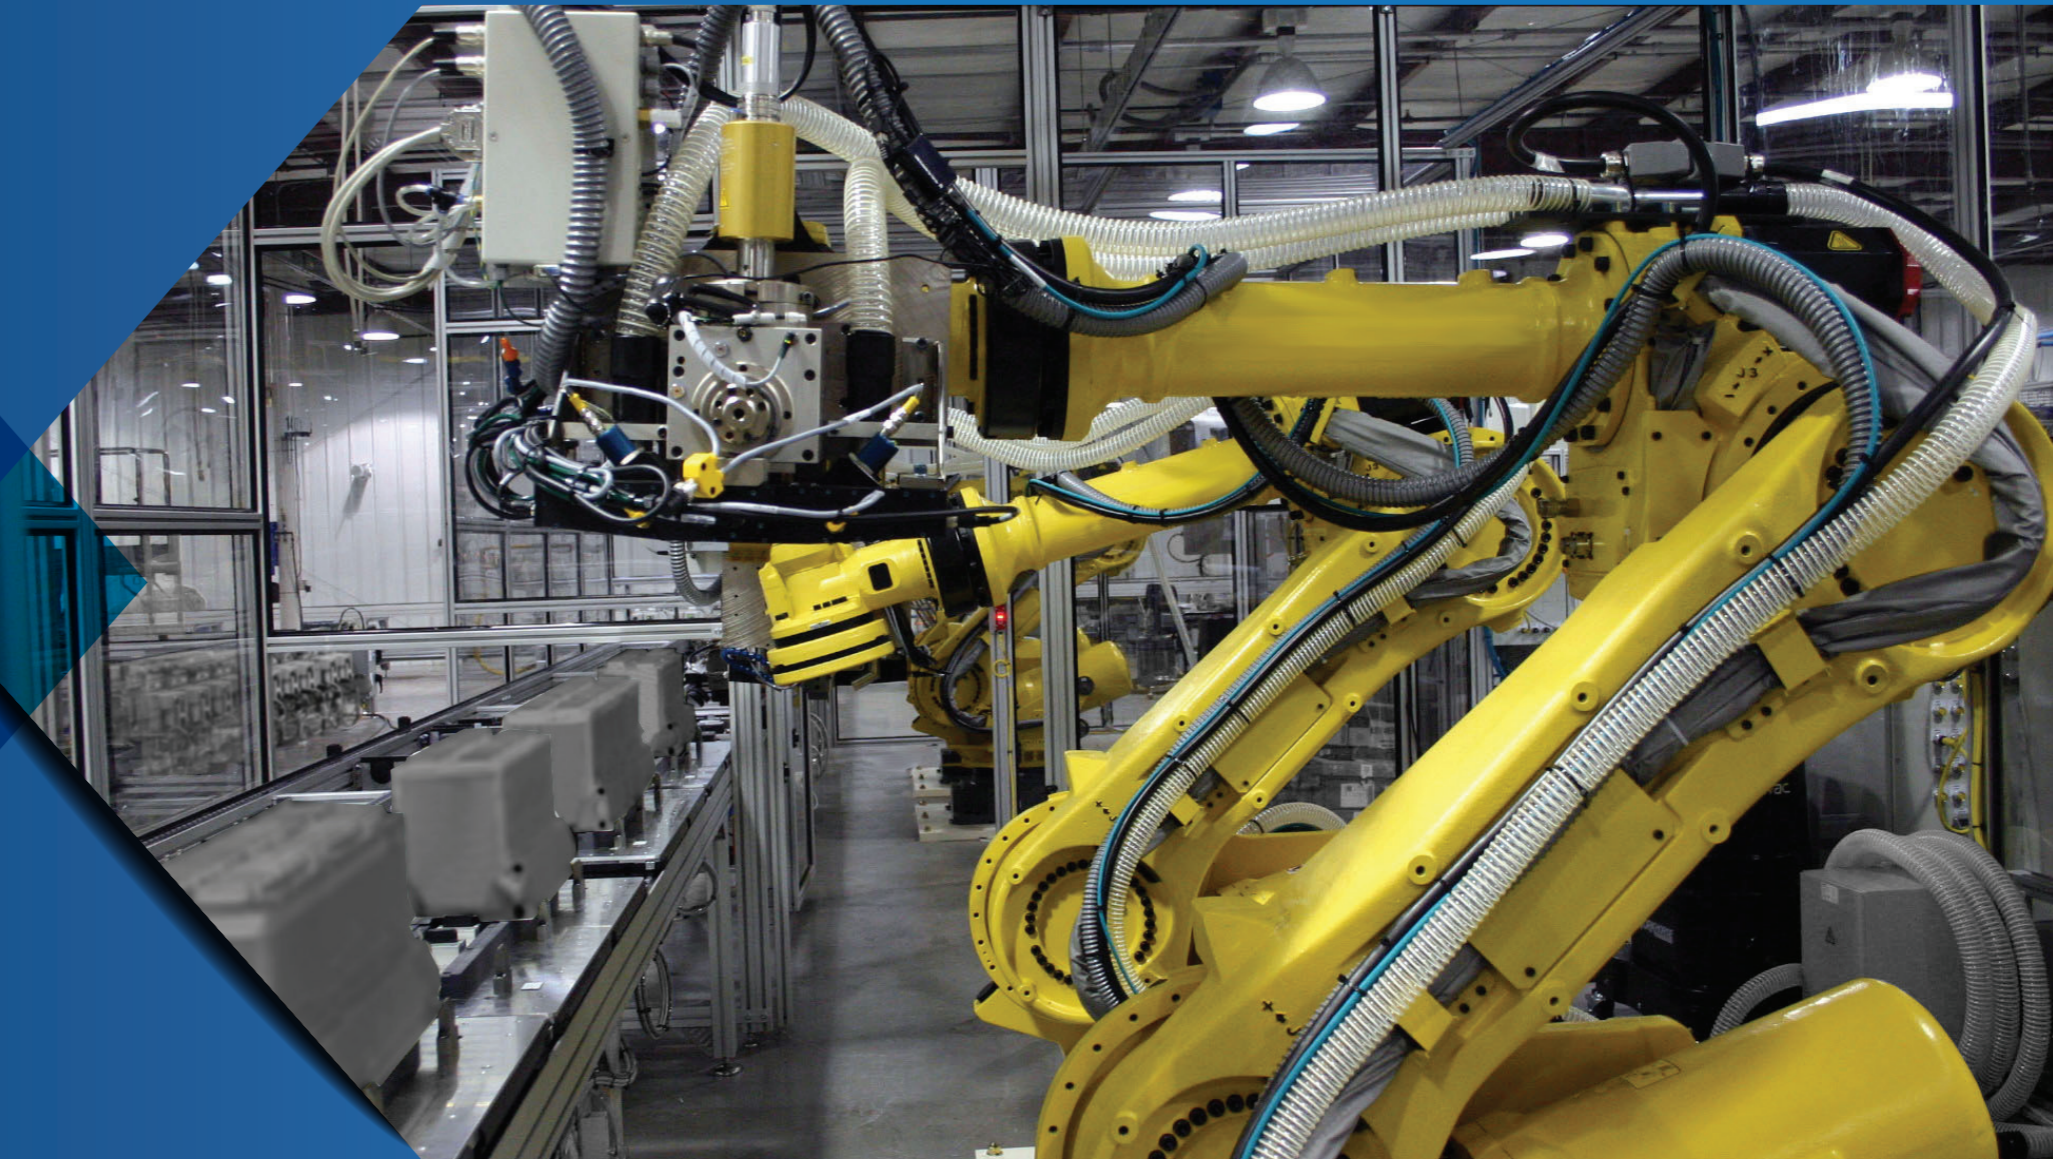

INDUSTRIAL AUTOMATION
Every day matters.

Complete Turnkey Solutions

R&D and Prototype Equipment
Test Systems
Development Engineering

Automated Manufacturing Systems
Assembly Systems
In Process Verification's (IPV) Test
End of Line (EoL) Test

Aftermarket Equipment and Services
Test Systems
Aftermarket Engineering
Service Programs

Market Segments

Power Storage Systems

Battery (Cylindrical, Prismatic, Pouch)
Fuel Cell

E- Drive Systems

Winding, Hair Pin and Continuous Hair Pin Technologies

Other EV Components:

Transmission (Hybrid, Plug-In Hybrid, E-Drive)
Compressor, Pumps, Steering, Braking, Sensors

Capabilities

We have fused our extensive expertise into a team aligned to deliver:

Scaleable and flexible design solutions
Expertly fabricated equipment
Robot and laser welding integration
IPV and EoL testing systems
Advanced service programs

Project Management

Effective program execution requires effective communication. Our program managers have established tools to exchange information with your experts throughout the duration of the program. This joint collaboration ensures successful implementation of your requirements and delivery on time and on budget.

ATS TEST INC.
 600 Chrislea Rd.
 Woodbridge, ON
 L4L 8K9 Canada

ENERGY & INDUSTRY
 730 Fountain St. N.
 Cambridge, ON
 N3H 4R7 Canada

ATS ASSEMBLY AND TEST, INC.
 1 ATS Drive
 Wixom, MI
 48393 USA

Global Footprint

Our Electric Vehicle team combines these prime locations to harness their industry leading experience and unique capabilities.

Every EV program benefits from our global services network spanning over 20 countries.
