

Digital shop floor processes with Manufacturing Manager

directly integrated with SAP ERP / S/4HANA

BEST PRACTICE
AVAILABLE!
GO LIVE READY IN
3 MONTHS

OUTSET / KEY CHALLENGES

- Process black box without real-time data & with high coordination effort
- Manual documentation & paper-based processes
- Third-party systems: Redundant data storage and interfaces

KEY PRODUCT BENEFITS

- Digital production file with real-time data recording and traceability
- Intuitive UI: guided processes & relevant information at the right time
- Integrated & flexible processes with single source of data

AVAILABLE FUNCTIONS

CAPTURE OF PRODUCTION DATA

Time and quantity-
based feedback of
processes

MANUFACTURING LOGISTICS

Scan-supported
functions for fast
implementation of
logistics processes

BUSINESS DOCUMENTS

Display of the
currently valid and
relevant production
documents

INTERFACES

Template for quick
integration of
external devices

TRACEABILITY

Setting up an
equipment structure
during the entire
production process

PRODUCTION RELATED QUALITY MGMT

Digital recording of
production-relevant
features

REPORTING

Display of the
production situation
in real time using
various evaluation
methods
